Passport

Paid Parking

Your Trusted Partner in Parking Technology

Built for cities and private operators, Passport's Parking Management Software simplifies parking operations, making it easier for customers to park and pay while optimizing back-office management.

With real-time insights, scalable technology, and flexible payment solutions, Passport helps you optimize curb space, enhance the parking experience, and drive revenue—all from a single, integrated system. By eliminating expensive hardware and manual processes, operators can make data-driven decisions that reduce costs, improve efficiency, and adapt to evolving mobility needs.

Core Benefits

Streamline Operations

- Real-time dashboards provide instant visibility into parking activity and revenue
- Comprehensive transaction and revenue reporting simplifies financial tracking
- Seamless enforcement and permitting integrations ensure accurate compliance and monitoring

Improve Customer & Staff Experiences

- iOS, Android, and mobile web apps offer convenient payment options
- Reminder notifications and remote session extensions in the mobile app enhance the user experience
- Guest Checkout lets parkers pay without downloading the app or creating an account

Reduce Costs & Scale Efficiently

- Lower processing fees by up to 50% with Passport's small transaction pricing model
- Minimize hardware reliance with digital payments, reducing maintenance costs
- Peak demand insights help optimize pricing and resource allocation
