## SpotBlock

Managing reservations has never been easier.

SpotBlock is the most efficient and effective meter bagging and reservation management system on the market, helping cities optimize the value of their parking spaces and curb assets.

Built for municipalities and operators, SpotBlock is used to create reservation types, manage parking space availability, and issue temporary blocks or reservations. The customer portal gives individuals and businesses a convenient way to submit requests to reserve parking spots for special events, construction projects, moving vehicles and more.

### Core Benefits

#### Eliminate Manual Work

Manage parking inventory and reservations more efficiently

#### Increase Revenue

Use parking data to charge for the true value of curb assets

#### Reduce Congestion

Improve traffic flow by making specific spots available to be reserved

#### Support Events

Identify designated areas for event setup or activities

#### Improve Safety

Create zones dedicated to providing easy public access

# Passport | Permits

## SpotBlock

Seamless System. Real-Time Reports.

Say goodbye to paper, spreadsheets. Reduce time spent determining what spaces are being reserved or available to be reserved and enjoy an easy-to-use approval process.

### Key Capabilities

- Build your own rules and rates
- Customize the customer-facing name
- Lockout holidays where spaces cannot be reserved
- Reporting to analyze revenue over time
- Override cost of reservations for interagency or specialty groups
- Fast and secure checkout for customers
- Integrations with other Passport solutions
