# Photo Enforcement

Manage compliance like never before.

Photo Enforcement is a cutting-edge technology revolutionizing traffic monitoring by enhancing safety and ensuring compliance in your off-street, frictionless environment.

With the ability to integrate with a variety of camera providers, Passport's Photo Enforcement solution equips municipalities and operators to manage and issue violations captured by fixed LPR cameras in a frictionless environment, by mail or directed enforcement. The result is a more efficient and streamlined operation, providing a transparent and seamless life cycle of the violation from start to finish.

Key Capabilities

Manage Compliance
- Enforce more accurately with real-time transfer of data
- Receive consistent updates on time limits, permit or scofflaw violations between the LPR camera, back office, and violator payment portal

Streamline Operations
- Operate more efficiently by billing through direct mail citations or directed enforcement
- Access custom reporting and LPR queue for permissible use scenarios to make more strategic decisions for your operations

Increase Revenue
- Manage frictionless environments more effectively to generate revenue
- Ensure citations make it to violators through a direct mail system where allowable

Improve the Violator Experience
- Provide a transparent and seamless life cycle of the violation from start to finish
- Decrease the amount of time between issuance and payment by allowing residents to quickly and securely pay their citations through the payment portal upon issuance
